Chapter 1

Introduction

This chapter is intended to give an overall description of this document, it contains various sections like:

- **Purpose:** in this section is described the purpose of this document.
- **Scope:** in this section is described the scope of the myTaxiService system.
- **Definitions, Acronyms, Abbreviations:** here are listed all the definitions, all the acronyms and all the abbreviations that the reader will encounter in this document.
- **Reference Documents:** here are listed all the documents that the reader may need to read to better understand what is written in this document.
- **Document Structure:** here is explained the internal structure of this document, giving a fast description of each chapter.

1.1 Purpose

The MyTaxi Service Design Document is intended to provide an explanation of how the system has been designed. It's also destined to give to the software development team an overall guidance to the implementation of the architecture of the software project.

1.2 Scope

scope section

1.3 Definitions, Acronyms, Abbreviations

Definitions Acronyms Abbreviations section

1.4 Reference Documents

reference documents section

1.5 Document Structure

document structure section

Chapter 2

Architectural Design

Heyheyhey

2.1 Overview

overview section

2.2 High Level Components and Their Interaction

high level components and their interaction section

2.3 Component View

component view section

2.4 Deployment View

deployment view section

2.5 Runtime View

runtime view section

2.6 Component Interfaces

component interfaces section

2.7 Selected Architectural Styles and Patterns

selected architectural styles and patterns section

2.8 Other Design Decisions

other design decisions section

Chapter 3

Algorithm Design

Heyheyhey

Chapter 4

User Interface Design

Heyheyhey

Chapter 5

Requirements Traceability
